hamad-rizki-personal

I am a recent graduate with hands-on experience and a keen interest in technology, manufacturing, administration, and services. I possess skills in utilizing Laravel and CodeIgniter frameworks and am accustomed to working effectively in team environments. Known for my high level of curiosity and enthusiasm for tackling new challenges, I have been involved in projects such as the development of a QR code-based attendance system, point of sale systems, WhatsApp API integration, and shipping cost verification services..

Skills

- HTML,CSS, Javascript, Jquery
- PHP, Python
- Laravel, Codeigniter
- Reactjs, Vuejs

- MySQL, PostgreSQL, Postman
- Github, Linux
- Devops

Work Experience

APRIL 2022 – DESEMBER 2023

Fullstack Developer

PT JAGAD DIGITAL SOLUSINDO Indonesian, Bogor

- Developed an attendance management system using CodeIgniter and JavaScript, enabling attendance recognition through QR code scanning.
- Designed and implemented a customized point of sale (POS) system for pharmacies, including features for transaction management and reporting.
- Created and managed a module for medication management within the system, including stock reporting.
- Enhanced and improved existing applications to increase functionality and system performance.

Junior Web Developer

PT JAGAD DIGITAL SOLUSINDO Indonesian, Bogor

- Developed and implemented a QR code-based attendance management system using Laravel and JavaScript, enabling efficient attendance monitoring.
- Created and managed organizational activities, including planning, coordination, event execution, as well as budget and resource management.
- Developed a comprehensive Point of Sales (POS) system using Laravel and Vue.js, with integration of the Quasar Framework.
- Responsible for designing and implementing essential modules, including inventory management, employee management, and setup of various purchasing methods.

AGUSTUS 2022 – JANUARI 2023

IT Support

PT FICO INDO REKAYASA Indonesian, Bekasi

- Configured Mikrotik devices to manage internet bandwidth, analyze networks, and monitor local networks to ensure optimal performance and network security.
- Developed and managed router configurations for office spaces and new branch locations, ensuring a stable and efficient network.
- Completed printer configurations for connectivity with client PCs, ensuring smooth printing operations and device accessibility.
- Configured employee email accounts using Thunderbird to ensure efficient communication and effective email management.
- Reinstalled and configured Windows operating systems on client PCs, ensuring proper functionality and alignment with user requirements.
- Configured Network Attached Storage (NAS) to establish a high-capacity server within the local network, enhancing storage capacity and data accessibility.
- Managed routine data backups for each company division, ensuring the security and integrity of critical data.

MEI 2017 – JULI 2017

IT Support (Internship)_

PT Prasadha Pamunah Limbah Industri Indonesian, Bogor

- Configured employee email accounts using Microsoft Outlook, ensuring efficient access and effective communication management.
- Reinstalled and configured Windows operating systems on client PCs, ensuring smooth operation and adherence to user specifications.
- Managed routine data backups for each company division, guaranteeing the security and continuity of critical company data.
- Supervised the implementation of corporate fund utilization in accordance with established regulations.
- Configured printers for connectivity with client PCs, facilitating effective printing and device integration.
